Java Developer – interested in new technologies

We are looking for **high-potential developers** with and exceptional skills in programming and software design and a high interest in new technologies.

Optravis LLC

Optravis LLC is a Swiss based company providing a unique software solution for operational transfer pricing management. Our clients are multinational companies with production and distribution sites spread all over the world. To match the high expectations of our clients, we use latest technology and development processes. Having a market proven and mature solution in place, Optravis preserved its entrepreneurial spirit which is shown through a very dynamic and rewarding environment.

Job Description

As a member of the development team you will improve our product, the Transfer Pricing Management Tool. This involves adding new functionality to the rich desktop client (Swing/JavaFX) as well as working on the highly scalable server backend component which is hosted in the Google App Engine. Depending on your background and interest, direct work with clients including traveling is possible as well.

Your Responsibilities

- Design, build and maintain clean, efficient and reliable Java and Kotlin code
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify bottlenecks and bugs, and devise solutions to these problems
- Help maintain code quality, organization and automatization
- Participate in workshops with clients to define appropriate requirements
- Scout for and experiment with new technologies

Your Skills

- Solid understanding of object-oriented programming and design patterns
- Experience in designing and developing large software applications
- Talent for writing clean, efficient and readable code
- Great verbal and written communication skills (E)
- Understanding of cloud concepts
- Experience with various design and architectural patterns
- Proficient in Java and/or Kotlin, with a good knowledge of their ecosystems
- Familiar with test driven development
- Familiar with build tools such as Maven and Gradle
- Familiar with Java GUI frameworks such as Swing and/or Java FX
- Knowledge of concurrency patterns in Java (RxJava, Futures, etc.)
- Interest in Kotlin coroutines
- Understanding of JVM, its limitations, weaknesses, and workarounds
- Able to use git
- EU/EFTA/CH passport complete your profile

What we offering you

- Join a motivated and highly skilled team
- Learn cutting-edge technologies like Kotlin, coroutines, AI, linear-optimisation, and other.
- Attractive remuneration and benefits
- Challenging work environment
- Central office location in Basel
- Start-up spirit (free coffee included ☺)
